# **Quick Start Guide**

### InDesign–Perfect Bound Covers

#### **Pages Panel**

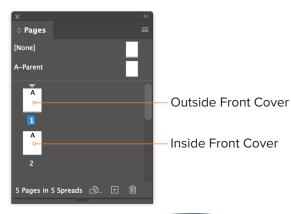

When creating a cover for a perfect bound project, there are several ways to build your document as indicated in the examples below. It's important that the **correct spine width**, which can be obtained from your CSR, is known before creating your document.

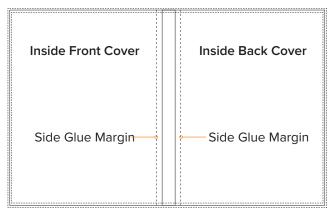

- The **Page Tool** was used to adjust the page width (spine). Export PDF as Spreads.

If you supply single pages, it's very important to name your PDFs correctly:

- Cover 1\_OFC.pdf (Outside Front Cover)
- Cover 2\_IFC.pdf (Inside Front Cover)
- O Cover 3\_IBC.pdf (Inside Back Cover)
- O Cover 4\_OBC.pdf (Outside Back Cover)
- O Cover 5\_Spine.pdf or Spine.pdf (Spine)

Margins	Inches	Fractions
Bleed	.125	1⁄8
Live Area	.125	1⁄8
Side Glue Margin (from Spine)	.3125	5⁄16

Side Glue Margin also applies to first and last pages.

## InDesign–Perfect Bound Covers

### **New Document**

Creating a new document (File > New > Document) for a perfect bound cover with 2 pages in 2 spreads.

New Document		
Document Preset: [Custom Intent: Print Number of Pages: 2	n]	
Start Page #: 1 Primary Text Frame Page Size: [Custom] ~		
Width: 🗘 17 in 🖕 Orientation: 👔 🗨 Height: 🗘 10.875 in		
Columns Number: 2 • Gutter: 2 0.25 in		
Margins         Left:         ○         0.125 in           Bottom:         ○         0.125 in         0.125 in         Right:         ○         0.125 in		
$^{\vee}$ Bleed and Slug		
Тор Во	ttom Left Right	
Bleed: 0.125 in 0.12	25 in 0.125 in 0.125 in 2	
Slug: 0 in 0 in	0 in 0 in 🖏	
Preview	Cancel OK	

Legacy New Document Dialog

**Page Size:** Your document should be built to the final trim size. In this example, 8.375 x 10.875 inches is used with a spine width of .25 inches. The spine width will vary depending on the number of pages and the stock.

**TIP** InDesign can do the math for you. It can add, subtract, multiply and divide in any field that you can type a number.

Width: 8.375 + .25 + 8.375 = 17 in Height: 10.875 in

**Columns:** In the Numbers field, enter 2 and in the Gutter field, enter .25 in, which represents your spine width. This will create guides for your spine.

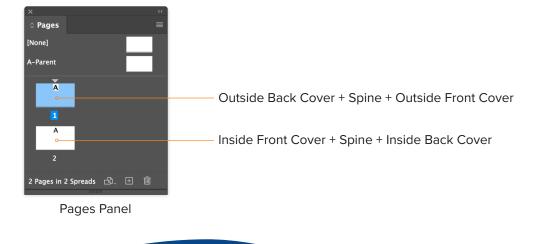

**Margins:** Images and text must be a minimum of an  $\frac{1}{8}$ " (.125 in) inside the trim, unless they bleed.

**Bleed:** Images and backgrounds intended to extend to the edge of the page must be extended an  $\frac{1}{8}$ " (.125 in) beyond trim.

#### Adobe InDesign

We can provide a template with the correct spine width, margins and drill holes, if applicable.
