

Acrobat–Font Not Embedded

Preflight

The following steps show you how to find out if one or more fonts are not embedded in a PDF using the built-in Preflight panel.

1. Open Adobe Acrobat Pro.
2. Choose Preflight from the Edit menu (Edit > Preflight...).
3. In the Find field, type: Font not embedded to filter the options.

4. Click Analyze

If any errors are found, click Show in Snap to visually examine the PDF.

When one or more fonts are not embedded, the PDF will not be able to be processed by prepress.
